

Whisonant Engineering Services, LLC was founded in March 2005, to provide structural engineering design services for commercial and residential projects. The company's founder Bill Whisonant graduated from the University of South Carolina with a bachelor of science in civil engineering and received his professional engineering license in 1986. Mr. Whisonant has 26 years of experience working for A/E firms 18 of those years were with design build A/E firms. For nearly five years Mr. Whisonant worked as director in inmate construction for the South Carolina Department of Corrections where his duties were programming, design, budgeting, purchasing building materials, scheduling and assigning personnel for over \$15 million of construction. During this time he supervised twenty three civilians and over two hundred inmates performing a variety of correctional renovation and new construction projects. Mr. Whisonant has structural design experience and contract administration for military, correctional, educational, hospitality, religious, office, commercial, health care, public housing, residential, condominium, student housing, resort and public utility projects. With design experience using, structural steel, concrete, precast, masonry and autoclave aerated concrete WES can provide structural design services for any type of construction.

We attribute our history of successful practice to providing value-added service; responsive, innovative design; accurate documents that minimize construction change orders; and attention to client needs, budgets, and schedules as a result of 30+ years of experience in the design and construction field.
